PROFILE

I am a UX/UI Designer with over 4 years of experience. I worked as co-founder and lead UX-UI designer at LOCUP Inc. and then as UX-UI designer at Wezzomart Inc. Later, I designed user-oriented interfaces for different sectors in freelance projects. Since September 2024, I have been working at PIER MTTP, where I designed OSOS dashboard panels, report sections and a fully responsive, full prototype panel. I continue to design new panel interfaces to improve the user experience. I aim to reach more professional levels in my career and contribute to innovative projects by creating user-oriented, aesthetic and functional designs.
